CORONAVIRUS (COVID – 19)

Dear Customers and staff,

There is understandable concern about COVID-19 in our communities right now and we would like you to know McCart Pharmacy is doing everything possible to help keep our staff and customers safe and healthy during this time. Your health and your family's health are paramount to us.

We have remained in close contact with the Centers for Disease Control and Prevention (CDC) and other federal and state agencies to monitor developments and updated guidance on coronavirus (COVID-19)

At McCart pharmacy, we are taking multiple actions to protect our staff and customers. First and foremost, as a healthcare provider, we have stringent sanitation practices in place, and we have increased the frequency of sanitation at our store. We are cleaning and sanitizing our floors and shelves especially the OTC area.

We also have emergency measures in place should a staff member become ill or if we are notified by a health agency of a patient or customer who has contracted COVID-19. If there comes a time where we learn of a staff member or patient in the store who has contracted COVID-19, we may need to adjust store hours or close a store temporarily if we are directed by the local health authority to do so. We will close temporarily, if it is in the best interest of our staff, customers and the greater public.

When it comes to protecting everyone's health, customers are still very much looking for cleaning and sanitation products, as well as masks. We are ordering and receiving new shipments of supplies please know we are working to re-stock and you will see more products on the shelves as soon as the inventory is available. You are welcome to call us ahead of visiting our store, to see if the items you are looking for are currently available.

If you have any questions or concerns about your health, we encourage you to contact your health care professional and this includes speaking with our pharmacists.

Priority for all of us right now needs to be constant hand washing, staying home if we are feeling sick, and if we do get sick, self-isolating at home to not spread the risk of the virus.

For more information on COVID-19 visit [CDC's Website](#) for current updates.

Sincerely

Management
